DESCRIPTION

Over the years MRM has adapted its products into the consumer preferences. So, from the traditional pork references MRM has applied its good work into raw materials as turkey. The company has created a juicy product which it's cut by hand in the own factory and showed to the customer ready to enjoy, keeping all its newness

ADVANTAGES / ATTRIBUTES

- Brine injection by ham artery without any piece variation
- Natural smoked with beech wood, creating a final product with a characteristic “bouquet”
- Cut by hand with a knife, keeping all the product attributes like cut in the point of sale

CONSUMPTION / PAIRING

While turkey is less juicy than pork meat, MRM resolves this item using its own brine and cutting up the product by hand in “chips” way. So the product becomes a perfect “tapa”, which could be seasoned with, for example, cherry tomatoes...
