DESCRIPTION

If MRM started half a century ago to develop its pork ham using a unique process, the company thought: “why don’t we apply same method with turkey ham?” As a result is this Turkey Ham, a complete demiboned piece, brine injected by ham artery and ready to be cut by hand with a knife or by machine

ADVANTAGES / ATTRIBUTES

- Natural smoked with beech wood, giving to the product more juiciness and flavor
- A complete piece, injected our own brain by artery
- Possibility to be cut by knife or machine
- Two formats: female turkey ham (1 Kg.) or male ham (2Kg.)

CONSUMPTION / PAIRING

Injecting our own brine by the artery using only a complete piece, it becomes an homogeneous product. The different cut possibilities gives rise to “tapas” cuts, slices for sandwiches or thickness fillets to be cooked in a pan and served as main course, together with vegetables
